Note: The denominator for each measure in the chart/table is all high school graduates in the selected student group. Blank cells indicate that data are not available or are not shown to prevent identifying individuals.

Exception: The "Postsecondary Intent" calculation for the Class of 2020 only includes graduates with available intent survey data. Due to COVID-19, 13.7% of all Class of 2020 graduates statewide (and 0.0% of Class of 2020 graduates currently displayed in the chart/table) did not report their graduate intentions and are not included in the denominator of the calculation.
